

‘GDPR vs GDP? An update on GDPR 2022’

Free webinar, Weds 1 February 2022, 13.00 – 13.20 following SRA AGM

With **Mark Phillips**, Information Security Officer at GIDE UK

It’s been a year since Mark presented ‘GDPR and Brexit – what researchers need to know’.

He left us with an uncertain picture as to what might unfold during 2021, including something of a cliff-hanger about how the transfer of personal data could evolve post-Brexit, or whether it would remain sustainable without intrusive legal and technical caveats.

Well, the world didn’t stop but it did change. Join the webinar to find out how, and to hear about recent initiatives for data reform, that aim to support ‘UK PLC’.

SRA members who attend the AGM are welcome to stay with us for this 20-minute webinar, which follows directly afterwards.
